

Computer & Wi-Fi Privacy Tips

Confirm the exact name of the free Wi-Fi network before signing on. *You never know*

Be careful about what information you type in!

Look for HTTPS or a padlock in the address bar!

Do not reuse passwords!
That is like having only one physical key for everything that you want locked.

Consider using Two-Factor Authentication logins on sites that offer the feature.

Delete your browser history after you are done!

Logout from each site!
Logout from the computer!
You might not want to keep everything open for the next person.
